# 2014 Beef Cattle Report

# ACKNOWLEDGMENTS

**Appreciation is expressed to the following firms, associations, or agencies who provided grant support for research in the beef cattle program.**

Cargill Corn Milling, Blair, Neb.  
DPI Global, Porterville, Calif.  
Elanco Animal Health, Indianapolis, Ind.  
Iowa Agricultural Bio Fibers, Harlan, Iowa  
KAAPA Ethanol, LLC, Minden, Neb.  
Lone Creek Cattle Company, Lincoln, Neb.  
Merck Animal Health, DeSoto, Kan.  
National Cattlemen's Beef Association, Centennial, Colo.

Nebraska Beef Council, Kearney, Neb.  
Nebraska Center for Energy Sciences Research,  
University of Nebraska–Lincoln, Neb.  
Nebraska Corn Board, Lincoln, Neb.  
Novus International, Saint Charles, Mo.  
Mississippi Lime, Ste. Genevieve, Mo.  
The Beef Checkoff, Centennial, Colo.  
USDA MultiState Hatch Funds  
USDA NIFA Climate Change

---

**Appreciation is also expressed to the following firms who provide products or services**

Archer Daniels Midland, Columbus, Neb.  
Cargill Corn Milling, Blair, Neb.  
Cattlemen's Nutrition Services, LLC, Lincoln, Neb.  
Elanco Animal Health, Indianapolis, Ind.  
GeneSeek, a Neogen Company, Lincoln, Neb.  
Greater Omaha Pack, Omaha, Neb.  
Iowa Limestone, Des Moines, Iowa

Novus International, Inc., St. Charles, Mo.  
Red Angus Association of America, Denton, Tex.  
US Meat Animal Research Center, Clay Center, Neb.  
USDA Meat Grading and Certification Branch, Omaha,  
Neb.  
Zoetis Animal Health, New York, N.Y.

---

**Appreciation is also expressed to the following research technicians, unit managers, and crew involved in the research programs at our various locations in Nebraska.**

**Agricultural Research & Development Center, Ithaca, Neb.**

# Table of Contents 2014 Nebraska Beef Cattle Report

## Cow/Calf

|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Effect of Pubertal Status and Number of Estrous Cycles Prior to the Breeding Season on Pregnancy Rate in Beef Heifers .....                        | 5  |
| Comparison of Long-term Progestin-based Synchronization Protocols on Fixed-time AI pregnancy Rate in Beef Heifers .....                            | 8  |
| Androgen Excess in Beef Cows Results in Altered Theca Cell Gene Expression and Fertility .....                                                     | 11 |
| Follicular <i>Vascular Endothelial Growth Factor A</i> Expression Before and After the LH Surge .....                                              | 14 |
| Evaluation of Genomic Predictors for Red Angus Cattle .....                                                                                        | 17 |
| Preconception Distillers Grains Supplementation Improves Mature Beef Cow Return to Estrous .....                                                   | 19 |
| Impact of Supplemental Protein Source on Pregnant Heifers .....                                                                                    | 21 |
| Effects of Winter Supplementation on Cow Performance and Post-Weaning Management on Steer and Heifer Progeny in a Late Spring Calving System ..... | 24 |
| Effects of Calf Age at Weaning on Cow and Calf Performance and Efficiency in a Drylot/Confinement Production System .....                          | 27 |

## Growing

|                                                                                                                                       |    |
|---------------------------------------------------------------------------------------------------------------------------------------|----|
| Effects of Forage Quality, MDGS, and Monensin on Performance, Methane Concentration, and Ruminal Fermentation of Growing Cattle ..... | 29 |
| Energy Value of De-Oiled Modified Distillers Grains Plus Solubles in a Forage Based Diet .....                                        | 32 |
| Replacement of Grazed Forage and Animal Performance when Distillers Grains are Fed in a Bunk or on the Ground on Summer Range .....   | 34 |
| Effects of Winter Supplementation Level on Yearling System Profit Across Economic Scenarios .....                                     | 36 |
| Distillers Grains Supplementation in a Forage System with Spayed Heifers .....                                                        | 39 |
| Economics of Distillers Grains Supplementation in a Forage System with Spayed Heifers .....                                           | 43 |
| Effect of Distillers Grains Plus Solubles Supplementation on Grazing Cattle Performance .....                                         | 46 |
| Effect of Distillers Grains Supplementation on Calves Grazing Irrigated and Non-irrigated Corn Residue .....                          | 48 |
| Effects of Grazing on Nebraska Sandhills Meadow Forage Nutrient Content .....                                                         | 50 |

## Forage Management and Crop Residue Utilization

|                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------|----|
| Effect of Irrigation Allocation on Perennial Grass Production and Quality .....                       | 52 |
| Dryland Cover Crops as a Grazing Option for Beef Cattle .....                                         | 56 |
| Using Enspira™ to Improve Fiber Digestion .....                                                       | 59 |
| Use of Treated Corn Residues in Growing Diets .....                                                   | 62 |
| Use of a Pelleted Corn Residue Complete Feed in Receiving Diets .....                                 | 64 |
| Alkaline Treated Wheat Straw or Corn Stover Fed to Growing Calves .....                               | 67 |
| Impact of Feeding Alkaline-treated Corn Stover at Elevated Amounts in Commercial Feedlot Cattle ..... | 69 |
| Optimum Inclusion of Alkaline Treated Cornstalks and Distillers Grains Fed to Calf-fed Steers .....   | 72 |

## Finishing

|                                                                                                                                                          |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Transitioning Cattle from RAMP® to a Finishing Diet on Feed Intake and Ruminal pH .....                                                                  | 75 |
| Transitioning Cattle from RAMP® to a Finishing Diet on Feedlot Performance and Feed Intake Variance .....                                                | 78 |
| Effects of Increasing Inclusion of Wet Distillers Grains Plus Solubles With and Without Oil Extraction on Finishing Performance .....                    | 81 |
| Effects of a Terminal Sorting System with Zipaterol Hydrochloride on Feedlot Steers .....                                                                | 83 |
| Evaluating Corn Condensed Distillers Solubles Concentration in Steam-Flaked Corn Finishing Diets on Cattle Performance and Carcass Characteristics ..... | 86 |
| Feeding Elevated Levels of Corn Silage and MDGS in Finishing Diets .....                                                                                 | 88 |
| Effects of Feeding NEXT ENHANCE® in Finishing Diets on Performance and Carcass Characteristics .....                                                     | 90 |
| Optimal Marketing Date of Steers Depends on Marketing Strategy .....                                                                                     | 92 |
| Effect of Micro-Aid® Supplementation on Nitrogen Losses from Manure .....                                                                                | 97 |

|                                                                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Effects of Dietary Change on Viral-bacterial Interactions in the Rumen of Cattle .....                                                                                             | 99  |
| Differences in Fecal Bacterial Community Composition between Beef Steers which are High-shedders<br>and Low-shedders of Shiga Toxin-producing <i>Escherichia coli</i> (STEC) ..... | 101 |

**Beef Products**

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Shelf life of Cooked Ground Beef Patties from Cattle Fed Wet Distillers Grains with Solubles .....                                                                            | 103 |
| Effect of Feeding Different Types of By-products and Concentrations throughout a Beef Growing System<br>on Ground Beef Color Lipid Oxidation .....                            | 105 |
| Lipid Oxidation of Cooked Ground Beef Links from Cattle Fed Distillers Grains in Different Phases of Production ....                                                          | 107 |
| Effect of Natural Antioxidant Concentration on Lipid Oxidation of Ready-to-Eat Ground Beef Links from Cattle<br>Fed Distillers Grains in Different Phases of Production ..... | 109 |
| Effects of Feeding Distillers Grains in a Yearling Beef System on Meat Quality .....                                                                                          | 111 |
| Effect of Feeding De-oiled Wet Distillers Grains Plus Solubles on Beef Oxidation and Tenderness .....                                                                         | 114 |
| Effect of Feeding De-oiled Wet Distillers Grains Plus Solubles on Beef Fatty Acid Profiles .....                                                                              | 116 |
| Nutrient and Tenderness Differences of Beef from Heifers Due to Mutation of the Myostatin Gene .....                                                                          | 119 |
| Vein Steak Differences in Strip Loins of Heifers Due to Mutation of the Myostatin Gene .....                                                                                  | 121 |
| The Effects of Diet and Cooler Aging on Specific Flavor Notes in Beef .....                                                                                                   | 123 |
| Grass Type, Grazing Supplementation, and Finishing Diets Affect Beef Fatty Acids .....                                                                                        | 126 |
| The Effect of Diet on the Biochemical Constituents of Beef .....                                                                                                              | 129 |
| The Effect of Diet and Cooler Aging on Consumer Panel Scores for Beef .....                                                                                                   | 133 |
| Statistics Used in the Nebraska Beef Report and Their Purpose .....                                                                                                           | 137 |
